

QR Codes in OAA

QR codes can be a nice way to use 'Controls' as there is an element of 'What will I find?'

Codes can be generated via:

- Apps
- From your PC

To differentiate is harder as each image / page would need its own QR code. Therefore, if you wanted two, three or four differentiated trails you would need a QR code for every picture.

They can be great at just giving a set of pupils a different task without all others knowing or seeing what it is. This can be helpful if you want to set up a trail where only a few pupils might have an even harder challenge or 'extension' activity or conversely where you want a simpler / differentiated activity for individuals.
